

ASSOCIATION OF CANNABINOID SPECIALISTS

An international association of healthcare professionals on the forefront of cannabinoid medicine.

OUR MISSION

The Association of Cannabinoid Specialists ensures the highest standards in the practice of cannabis medicine, safeguards patient care with clinical best practices, and interfaces with other stakeholders in the cannabis community. We believe that patients are uniquely vulnerable and have very different needs than recreational users. We provide evidence and experience-based education for patients, cannabis clinicians, referring clinicians, and lawmakers to help them understand cannabis medicine and make informed decisions. We are an advocacy organization striving to provide guidance on best practices in the laws and regulations at the federal, state, and international levels.
